FEATURED SHOPIFY PROJECTS

- 📁 ZarDoch: zardoch.myshopify.com – Custom Theme Development & UI/UX
- 🏠 NordHaven: nordhaven-15.myshopify.com – Store Setup & Product Architecture
- 🎮 Aalam Sports: alambravi-2.myshopify.com – Performance Optimization & Full Configuration

CAREER OBJECTIVE

Since August 2024, I have operated as a Freelance Shopify Developer, bridging the gap between complex programming logic and e-commerce growth. I specialize in deep theme-side customization, focusing on building high-converting product architectures using Shopify CLI, Liquid, and Metaobjects. I don't just build stores; I engineer scalable business tools that allow merchants to manage complex product data with ease. By prioritizing clean code, technical SEO, and performance optimization, I ensure every store I touch is fast, mobile-responsive, and strategically built for conversion.

SKILLS

Shopify Development: Shopify Liquid, Theme Customization, Custom Sections, Snippets, Templates, Shopify CLI

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), AJAX, Responsive Web Design

Shopify features: Product Pages, Collections, Navigation, Metafields, Theme Architecture, Store Configuration

Version Control & Tools: Git, GitHub, VS Code, Shopify CLI, Chrome DevTools, Postman

eCommerce Optimization: SEO, Mobile Optimization, Performance Optimization, User Experience (UX)

Additional Skills: React.js, Java, REST APIs, WordPress, Meta Ads, Google Ads

EXPERIENCE

Shopify Developer | Freelance / Project-Based

August 2024 – Present

- **Custom Theme Development:** Leveraging a strong background in programming logic to develop and customize Shopify stores using Shopify Liquid, HTML5, CSS3, and JavaScript (ES6+).
- **Technical Problem Solving:** Applying deep understanding of software development principles to write clean, maintainable, and optimized Liquid code for complex business requirements.
- **Shopify CLI & Workflow:** Utilizing Shopify CLI, Git, and GitHub for professional local development, version control, and seamless deployment of theme updates.

- **Custom Sections & Logic:** Building reusable and dynamic theme sections with advanced conditional logic to enhance the admin customization experience.
- **Data & Inventory Management:** Managing complex product architectures, bulk data imports via CSV, and organizing collections for optimal store performance.
- **Performance Optimization:** Focusing on store speed and mobile responsiveness by optimizing scripts, images, and liquid snippets for a better user experience.
- **Full Store Setup:** Configuring end-to-end store settings including shipping zones, tax rules, payment gateways (COD and online), and domain integration.
- **Technical SEO:** Implementing structured data, metadata optimization, and search-friendly site architecture to improve organic visibility.

KEY PROJECTS

ZarDoch | Premium Cultural Fashion & E-commerce Architecture

Live Store: <https://zardoch.myshopify.com/>

- Built a complete Shopify clothing store using Dawn theme, Liquid, CSS, JavaScript, collections, pricing, inventory, and mobile-responsive layout.
- Imported and managed products using Shopify CSV import with optimized product images.

NordHaven | Bespoke Home & Interior Architecture

Live Store: <https://nordhaven-15.myshopify.com/>

- Customized Shopify Dawn theme using Liquid, Shopify CLI, Git, and GitHub.
- Developed custom sections, snippets, product pages, collection pages, and responsive layouts.
- Implemented high-performance AJAX-driven functionality, including dynamic slide-out carts and real-time variant filtering, using the Shopify AJAX API to deliver a seamless, app-free user experience.

Aalam Sports Store – Sports eCommerce Store

Live Store: <https://alambravi-2.myshopify.com/>

- Custom Store Architecture: Architected a fully responsive storefront from the ground up, utilizing custom Liquid schema to create a flexible, merchant-friendly admin experience for the homepage and navigation.
- Dynamic Liquid Logic: Engineered advanced product templates using Metafields and conditional Liquid logic to display technical product specifications, size guides, and performance data dynamically.
- Asynchronous UX Development: Integrated AJAX-based "Add to Cart" and real-time search functionality, reducing page reloads and creating a high-speed, app-free shopping experience for mobile users.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Virtual University of Pakistan | *Graduated: December 2024*

- Core Focus: Software Engineering, Web Technologies, and Advanced Logic.
- Technical Foundation: Applied CS principles to write clean, maintainable code for e-commerce environments.

CERTIFICATIONS

- Web Development Certified from Omni academy 2018
